FOUNDER & CEO
Jaco van Rensburg

From first concept to launch and ongoing support.

Nexsweb structures each project around the organisation, its audience, the required functionality and the action users need to take.

Custom Websites Responsive business and organisational websites with clear user journeys and conversion paths.	eCommerce Stores Product catalogues, payments, mobile checkout and practical store-management foundations.
Web Applications Client portals, dashboards, admin systems, integrations and purpose-built digital workflows.	SEO & Performance On-page SEO foundations, technical structure, speed optimisation and analytics readiness.
Hosting & Domains Domain setup, SSL, DNS, professional email and deployment assistance.	Care & Maintenance Content updates, security monitoring, backups, support and continuous improvements.

A clear route from idea to launch.

01 DISCOVER Goals, audience, scope, content, functionality and success criteria.	02 DESIGN Information architecture, user journeys and visual direction.
03 DEVELOP Responsive build, integrations, forms, testing and optimisation.	04 LAUNCH Deployment, analytics readiness, handover and post-launch support.

Built in South Africa. Ready to deliver worldwide.

- Remote collaboration: discovery, feedback, approvals and launch can be managed online.
- Structured milestones: projects can be divided into clear stages with defined review points.
- Scalable builds: digital foundations can be expanded as content, teams and services grow.
- Audience-first UX: navigation and conversion journeys are shaped around the people the organisation needs to reach.

Public information should be easy to find and services easy to use.

Nexsweb can design public-facing platforms around clarity, mobile usability, maintainable content and accessibility-aware implementation. Solutions can be shaped to suit the organisation's actual service and information requirements.

Public Information Architecture Clear navigation for departments, services, notices, contact information and public resources.	Notices & Documents Structured access to announcements, policies, reports, forms and downloadable documents.
Service Request Forms Digital enquiries and request workflows designed to capture the right information from residents or users.	Accessibility-Aware UX Readable layouts, semantic structure, keyboard-aware components and mobile-friendly interactions.
Department Directories Organised department, official and service-contact information designed for quick discovery.	Ongoing Support Maintenance, content changes, security-minded updates and practical support after launch.

Professional delivery without the guesswork.

Mobile-first thinking Interfaces designed to remain usable across phones, tablets and desktops.	Performance foundations Lean assets, sensible structure and attention to page speed.
Clear communication Plain-language updates, defined review points and practical handover.	SEO-ready structure Semantic content, metadata, sitemap and search-engine discoverability foundations.
Security-minded delivery SSL, sensible handling of forms and production-aware deployment practices.	Support after launch Maintenance and continued improvement can be included after deployment.

SELECTED CAPABILITY DEMONSTRATIONS

Nexus Consulting • Prime Auto Parts • Aura Logistiqs • Elite Property Buyers • Vault Streetwear • Flow Command

Portfolio examples are presented as concept/capability demonstrations unless a project is explicitly identified as verified client work.
